

State-of-the-Art Outpatient Care

The New Outpatient Clinical Center at BID-Needham

Extraordinary medical experts in cardiology, endocrinology, gastroenterology, nephrology, neurology, orthopaedics, rheumatology, surgical specialties and more.

The new Outpatient Clinical Center represents a significant advancement for BID-Needham, and builds on the existing strengths of the hospital in outpatient services. The four-story, 37,000-square-foot facility broadens the scope and depth of services patients can receive in a convenient, community setting.

The new building brings together ambulatory services under one roof in an easy-to-access Needham location, connected via the Trotman Family Bridge to the hospital, with on-site, valet parking—and the same patient-centered care that BID-Needham is known for. Together, the centralized services will make care more accessible for patients and more collaborative for physicians.

Services and Clinicians in the New Outpatient Clinical Center include:

Cardiology / Vascular Surgery The Levine Family Department of Cardiology

To schedule an appointment, call 781-453-7750.

Our team of physicians, nurses and staff are part of the CardioVascular Institute (CVI) at BID-Needham and Beth Israel Deaconess Medical Center (BIDMC). They work collaboratively to provide you with exceptional care. Patients who require complex cardiovascular care not available at BID-Needham have seamless access to highly specialized services at the CVI at BIDMC, ranging from angioplasty and stenting to minimally invasive and open heart and vascular surgery.

Managing care in the community for Aortic disease • Arrhythmias
 • Cancer-related heart disease • Coronary artery disease
